

Instagram carousel campaign

A copy-paste pack: 10 feature posts, each with a hook, a slide-by-slide plan, a self-contained AI image prompt (brand guidelines baked in) that builds every slide around a photo of your own ingredients, the screenshots to capture, a caption and hashtags.

HOW TO USE EACH POST

- Photograph the real ingredients you want this carousel to feature — e.g. the chicken, coriander and peppers you're about to cook. One clear, well-lit photo.
- Take the listed app screenshots (clean status bar, light mode).
- In ChatGPT (use a model with image input / image generation), UPLOAD your ingredients photo, then paste the whole MASTER PROMPT. It builds the carousel around your actual ingredients. The phone screens come out as mint 'SCREENSHOT' placeholders.
- Drop your real screenshots into the placeholder phone screens (Canva, Figma or Photoshop).
- Post the carousel with the caption + hashtags. Lead slide = the question; last slide = the payoff.

Because every prompt is driven by your uploaded photo, the same prompt gives a fresh, on-brand carousel every time — so your grid stays varied and authentic. Tip: photograph what you'll genuinely cook, so the screenshots and imagery match.

Brand guidelines

These are baked into every master prompt, but here they are in full for your designer.

COLOURS

- Cream background #FAF7F2
- Primary green #2F7D5A
- Deep green #28694C
- Soft mint #E6EFE8
- Leaf green #7BB497
- Ink (near-black) #1F1B16
- Soft ink #6B6358
- Off-white #FFFDF8

FONTS

- Headlines: 'Fraunces' — elegant high-contrast serif (free on Google Fonts). Fallbacks: Playfair Display, DM Serif Display.
- Body / UI: 'Plus Jakarta Sans' — clean geometric sans (free on Google Fonts). Fallback: Inter, Poppins.

LOOK & FEEL

- Real, lived-in home kitchens in natural daylight; editorial and warm, a little moody. Never sterile stock.
- Overlays = floating rounded pill chips & soft cards, cream/white with a green icon + ink text and a soft shadow — the same callouts as the website. 'NEW' = solid green uppercase pill.
- Format: 1080x1350 (4:5), ~90px safe margin, small 'What's in my Fridge' wordmark bottom-left on every slide.

Post 1 — Snap your shopping — auto-logged

THE HOOK (slide 1 question)

What if your fridge tracked itself?

THE CAROUSEL

- Slide 1 (hook, lifestyle): paper grocery bags spilling fresh produce on a sun-lit kitchen counter.
- Slides 2–4 (app in use): photographing the shop, AI recognises every item, fridge auto-organised.
- Slide 5 (payoff): 'Your kitchen, finally organised.' + free CTA.

MASTER PROMPT — paste this whole block into your AI image tool

Create a 5-slide Instagram carousel (1080x1350 each) for the feature: Snap your shopping — auto-logged. Generate each slide as a separate image. Follow the brand style exactly.

BRAND STYLE — apply to EVERY slide:

- App: "What's in my Fridge" — a calm, premium home-cooking app that tracks your fridge and tells you what to cook.
- Colours: warm cream background #FAF7F2; primary green #2F7D5A; deep green #28694C; soft mint #E6EFE8; leaf green #7BB497; near-black ink #1F1B16; soft ink #6B6358; off-white #FFFDF8.
- Fonts: big headlines set in 'Fraunces' (an elegant high-contrast serif); all supporting text and UI labels in 'Plus Jakarta Sans' (a clean geometric sans).
- Mood: bright natural daylight, real lived-in home kitchens, editorial and modern, warm and aspirational with a little moodiness. Never sterile, corporate, or cheesy stock.
- Overlays: floating rounded 'pill' chips and soft cards (fully rounded corners, gentle drop shadow, cream/white fill, a small green icon + ink text) — the same UI-callout look as the website. 'NEW' tags are solid green uppercase pills. Category chips are tiny rounded tags (produce = soft green, dairy = soft blue, bakery = soft tan).
- Format: 1080 x 1350 px vertical (4:5). Keep a ~90px clear safe margin. Put a small 'What's in my Fridge' wordmark (the word 'Fridge' in green with a tiny leaf) in the bottom-left of every slide.
- Phone mockups: a sleek modern smartphone, thin dark bezel, rounded corners, soft shadow, tilted ~8 degrees. IMPORTANT — leave the phone SCREEN as a flat placeholder filled solid mint #E6EFE8 with the word 'SCREENSHOT' centred; I will drop my real app screenshot in afterwards.
- Keep it cool and trendy — like a high-end food brand, not a boring explainer. Vary compositions so slides feel fresh.

USE MY UPLOADED PHOTO — IMPORTANT:

- Alongside this prompt I am uploading ONE photo of real ingredients I have at home (for example chicken, coriander, peppers and rice — but it will be whatever I actually photographed this time).
- Treat my uploaded photo as the single source of truth for all the FOOD in this carousel. Wherever a slide shows ingredients, groceries, a fridge, meal ideas or a finished dish, build it from the ACTUAL items visible in my photo — the same ingredients, colours and quantities. Keep them photo-real and appetising.
- Any specific foods named in the slide descriptions below are only examples — replace them with what is actually in my photo. Do NOT invent hero ingredients that aren't in my photo.
- Where a slide shows meal ideas or a finished dish, make them dishes you could realistically cook from MY photographed ingredients, and use those real dish names in the overlay text (e.g. if I photographed chicken + coriander + lime, a slide might suggest 'Coriander-lime chicken').
- Keep the brand styling, overlays, layout and text below exactly as described — only the food itself should change to match my photo.

SLIDES (the food in these should match my uploaded photo):

- Slide 1 — HOOK. Lifestyle photo: two paper grocery bags on a bright sunlit kitchen counter, fresh veg and bread poking out, morning light. Large Fraunces headline overlaid top: "What if your fridge tracked itself?" Minimal, editorial.
- Slide 2 — App in use. Photo of a hand holding a phone over the unpacked groceries on the counter, about to snap them. Phone shown as a mockup with the SCREENSHOT placeholder screen. A floating green pill overlay reads 'Snap your shopping'. A subtle diagonal scan-line shimmer across the groceries. Small caption card bottom: 'One photo. Everything logged.'
- Slide 3 — App in use. Clean cream background, the phone mockup centred (SCREENSHOT placeholder). Around it float small rounded category chips: 'Produce', 'Dairy', 'Bakery', and a green 'NEW' pill. Headline: 'AI reads every item — no

typing.'

Slide 4 — Lifestyle + app. A tidy, full fridge with the phone resting against it showing the inventory (SCREENSHOT placeholder). Soft overlay pill: 'Always know what's in.'

Slide 5 — PAYOFF. Warm cream slide, no phone. Big Fraunces line: 'Your kitchen, finally organised.' Smaller Jakarta sub: 'Snap it. Sorted. Free to start — no card.' Centre a neat 'What's in my Fridge' wordmark with leaf.

SCREENSHOTS TO CAPTURE

- Scan screen mid-scan (the camera/scan view).
- The review screen right after a scan — the list of recognised items with categories.
- The fridge/inventory list grouped into categories (Produce, Dairy, Bakery...).
- An item card showing the green 'NEW' tag.

CAPTION

What if your fridge just... tracked itself?

Drop the shopping on the counter, take one photo, and What's in my Fridge logs every item for you — names, categories, the lot. No typing, no spreadsheets.

Always know what you've got. Cook more, waste less.

Try it free — no card. Link in bio.

Post 2 — Dinner from a photo (Tonight)

THE HOOK (slide 1 question)

Sick of staring into the fridge at 6pm?

THE CAROUSEL

- Slide 1 (hook): someone leaning on an open fridge, evening light, unsure.
- Slides 2–4: snap what you've got → AI suggests real dinners → pick one.
- Slide 5 (payoff): a finished plate. 'Dinner. Sorted in seconds.'

MASTER PROMPT — paste this whole block into your AI image tool

Create a 5-slide Instagram carousel (1080x1350 each) for the feature: Dinner from a photo (Tonight). Generate each slide as a separate image. Follow the brand style exactly.

BRAND STYLE — apply to EVERY slide:

- App: "What's in my Fridge" — a calm, premium home-cooking app that tracks your fridge and tells you what to cook.
- Colours: warm cream background #FAF7F2; primary green #2F7D5A; deep green #28694C; soft mint #E6EFE8; leaf green #7BB497; near-black ink #1F1B16; soft ink #6B6358; off-white #FFFDF8.
- Fonts: big headlines set in 'Fraunces' (an elegant high-contrast serif); all supporting text and UI labels in 'Plus Jakarta Sans' (a clean geometric sans).
- Mood: bright natural daylight, real lived-in home kitchens, editorial and modern, warm and aspirational with a little moodiness. Never sterile, corporate, or cheesy stock.
- Overlays: floating rounded 'pill' chips and soft cards (fully rounded corners, gentle drop shadow, cream/white fill, a small green icon + ink text) — the same UI-callout look as the website. 'NEW' tags are solid green uppercase pills. Category chips are tiny rounded tags (produce = soft green, dairy = soft blue, bakery = soft tan).
- Format: 1080 x 1350 px vertical (4:5). Keep a ~90px clear safe margin. Put a small 'What's in my Fridge' wordmark (the word 'Fridge' in green with a tiny leaf) in the bottom-left of every slide.
- Phone mockups: a sleek modern smartphone, thin dark bezel, rounded corners, soft shadow, tilted ~8 degrees. IMPORTANT — leave the phone SCREEN as a flat placeholder filled solid mint #E6EFE8 with the word 'SCREENSHOT' centred; I will drop my real app screenshot in afterwards.
- Keep it cool and trendy — like a high-end food brand, not a boring explainer. Vary compositions so slides feel fresh.

USE MY UPLOADED PHOTO — IMPORTANT:

- Alongside this prompt I am uploading ONE photo of real ingredients I have at home (for example chicken, coriander, peppers and rice — but it will be whatever I actually photographed this time).
- Treat my uploaded photo as the single source of truth for all the FOOD in this carousel. Wherever a slide shows ingredients, groceries, a fridge, meal ideas or a finished dish, build it from the ACTUAL items visible in my photo — the same ingredients, colours and quantities. Keep them photo-real and appetising.
- Any specific foods named in the slide descriptions below are only examples — replace them with what is actually in my photo. Do NOT invent hero ingredients that aren't in my photo.
- Where a slide shows meal ideas or a finished dish, make them dishes you could realistically cook from MY photographed ingredients, and use those real dish names in the overlay text (e.g. if I photographed chicken + coriander + lime, a slide might suggest 'Coriander-lime chicken').
- Keep the brand styling, overlays, layout and text below exactly as described — only the food itself should change to match my photo.

SLIDES (the food in these should match my uploaded photo):

Slide 1 — HOOK. Lifestyle photo: a person leaning on the open door of a glowing fridge in a dim evening kitchen, looking unsure, takeaway menu on the side. Fraunces headline: 'Sick of staring into the fridge at 6pm?'

Slide 2 — App in use. Phone (SCREENSHOT placeholder) held up to a handful of fresh ingredients laid on a board — peppers, chicken, half an onion. Floating pill: 'Snap what you've got'. Caption card: 'No plan needed.'

Slide 3 — App in use. Phone mockup (SCREENSHOT placeholder) on a cream background showing meal-idea cards. Around it, three floating pill cards each naming a dish (e.g. 'Chicken fajita bowl', 'Quick stir-fry', 'Pepper pasta'). Headline: 'Real meals from what's actually in.'

Slide 4 — Lifestyle + app. Overhead of cooking in progress — sizzling pan, chopped veg — phone propped showing the

recipe (SCREENSHOT placeholder). Overlay pill: 'Built around tonight's ingredients.'

Slide 5 — PAYOFF. A beautiful finished plate of food on a wooden table, steam rising, warm light. Fraunces line: 'Dinner. Sorted in seconds.' Sub: 'Free to use — no card.' Wordmark bottom-left.

SCREENSHOTS TO CAPTURE

- The 'Tonight' / photo→dinner camera screen.
- The meal-ideas results screen after snapping (the cards).
- A single meal idea card expanded (uses + to-buy).
- The recipe/method walkthrough for one of the meals.

CAPTION

The 6pm fridge stare ends here.

Snap whatever you've got and What's in my Fridge turns it into real dinner ideas you can actually make tonight — no recipe hunting, no takeaway guilt.

Hungry? Just point your camera.

Free to use — link in bio.

Post 3 — Use it before you lose it (freshness)

THE HOOK (slide 1 question)

Tired of binning food you forgot you had?

THE CAROUSEL

- Slide 1 (hook): sad wilted herbs/veg about to be thrown out.
- Slides 2–4: the app flags what's going off, floats it to the top, suggests using it.
- Slide 5 (payoff): fresh food saved. 'Nothing forgotten. Nothing wasted.'

MASTER PROMPT — paste this whole block into your AI image tool

Create a 5-slide Instagram carousel (1080x1350 each) for the feature: Use it before you lose it (freshness). Generate each slide as a separate image. Follow the brand style exactly.

BRAND STYLE — apply to EVERY slide:

- App: "What's in my Fridge" — a calm, premium home-cooking app that tracks your fridge and tells you what to cook.
- Colours: warm cream background #FAF7F2; primary green #2F7D5A; deep green #28694C; soft mint #E6EFE8; leaf green #7BB497; near-black ink #1F1B16; soft ink #6B6358; off-white #FFFDF8.
- Fonts: big headlines set in 'Fraunces' (an elegant high-contrast serif); all supporting text and UI labels in 'Plus Jakarta Sans' (a clean geometric sans).
- Mood: bright natural daylight, real lived-in home kitchens, editorial and modern, warm and aspirational with a little moodiness. Never sterile, corporate, or cheesy stock.
- Overlays: floating rounded 'pill' chips and soft cards (fully rounded corners, gentle drop shadow, cream/white fill, a small green icon + ink text) — the same UI-callout look as the website. 'NEW' tags are solid green uppercase pills. Category chips are tiny rounded tags (produce = soft green, dairy = soft blue, bakery = soft tan).
- Format: 1080 x 1350 px vertical (4:5). Keep a ~90px clear safe margin. Put a small 'What's in my Fridge' wordmark (the word 'Fridge' in green with a tiny leaf) in the bottom-left of every slide.
- Phone mockups: a sleek modern smartphone, thin dark bezel, rounded corners, soft shadow, tilted ~8 degrees. IMPORTANT — leave the phone SCREEN as a flat placeholder filled solid mint #E6EFE8 with the word 'SCREENSHOT' centred; I will drop my real app screenshot in afterwards.
- Keep it cool and trendy — like a high-end food brand, not a boring explainer. Vary compositions so slides feel fresh.

USE MY UPLOADED PHOTO — IMPORTANT:

- Alongside this prompt I am uploading ONE photo of real ingredients I have at home (for example chicken, coriander, peppers and rice — but it will be whatever I actually photographed this time).
- Treat my uploaded photo as the single source of truth for all the FOOD in this carousel. Wherever a slide shows ingredients, groceries, a fridge, meal ideas or a finished dish, build it from the ACTUAL items visible in my photo — the same ingredients, colours and quantities. Keep them photo-real and appetising.
- Any specific foods named in the slide descriptions below are only examples — replace them with what is actually in my photo. Do NOT invent hero ingredients that aren't in my photo.
- Where a slide shows meal ideas or a finished dish, make them dishes you could realistically cook from MY photographed ingredients, and use those real dish names in the overlay text (e.g. if I photographed chicken + coriander + lime, a slide might suggest 'Coriander-lime chicken').
- Keep the brand styling, overlays, layout and text below exactly as described — only the food itself should change to match my photo.

SLIDES (the food in these should match my uploaded photo):

- Slide 1 — HOOK. Lifestyle photo: a hand holding limp, yellowing herbs and a soft pepper over an open kitchen bin, regretful. Moody natural light. Fraunces headline: 'Tired of binning food you forgot you had?'
- Slide 2 — App in use. Phone mockup (SCREENSHOT placeholder) showing the fridge list with the soonest-to-expire items at the top. Floating amber pill: 'Use soon' and a small red pill 'Today'. Headline: 'It flags what's going off — first.'
- Slide 3 — App in use. Cream background, phone (SCREENSHOT placeholder). A floating card overlay: 'Use these up:' with little chips 'Spinach', 'Yoghurt', 'Peppers'. Caption: 'A gentle nudge, not a guilt trip.'
- Slide 4 — Lifestyle + app. Bright fridge, beautifully fresh, phone showing all-green 'in date' inventory (SCREENSHOT placeholder). Overlay pill: 'Everything tracked from the day you add it.'

Slide 5 — PAYOFF. A glossy fresh stir-fry or salad made from rescued veg, top-down, vivid. Fraunces line: 'Nothing forgotten. Nothing wasted.' Sub: 'Save food. Save money.' Wordmark.

SCREENSHOTS TO CAPTURE

- Inventory with the amber/red 'use soon' items sorted to the top.
- An item card showing its age/days tracked.
- The expiring-items banner/nudge.
- Chat 'Use what's expiring' result (optional).

CAPTION

The average UK household bins hundreds of pounds of good food a year — usually stuff we forgot was there.

What's in my Fridge tracks every item from the day you add it and floats whatever's going off to the top, so you use it in time.

Eat it before you bin it.

Try it free — link in bio.

Post 4 — Ask what to cook (chat)

THE HOOK (slide 1 question)

"There's nothing to eat" — in a full fridge?

THE CAROUSEL

- Slide 1 (hook): a glowing open fridge at night, clearly full, silhouette looking in.
- Slides 2-4: ask the app, it reads your inventory and answers with real meals.
- Slide 5 (payoff): 'A full fridge always has an answer.'

MASTER PROMPT — paste this whole block into your AI image tool

Create a 5-slide Instagram carousel (1080x1350 each) for the feature: Ask what to cook (chat). Generate each slide as a separate image. Follow the brand style exactly.

BRAND STYLE — apply to EVERY slide:

- App: "What's in my Fridge" — a calm, premium home-cooking app that tracks your fridge and tells you what to cook.
- Colours: warm cream background #FAF7F2; primary green #2F7D5A; deep green #28694C; soft mint #E6EFE8; leaf green #7BB497; near-black ink #1F1B16; soft ink #6B6358; off-white #FFFDF8.
- Fonts: big headlines set in 'Fraunces' (an elegant high-contrast serif); all supporting text and UI labels in 'Plus Jakarta Sans' (a clean geometric sans).
- Mood: bright natural daylight, real lived-in home kitchens, editorial and modern, warm and aspirational with a little moodiness. Never sterile, corporate, or cheesy stock.
- Overlays: floating rounded 'pill' chips and soft cards (fully rounded corners, gentle drop shadow, cream/white fill, a small green icon + ink text) — the same UI-callout look as the website. 'NEW' tags are solid green uppercase pills. Category chips are tiny rounded tags (produce = soft green, dairy = soft blue, bakery = soft tan).
- Format: 1080 x 1350 px vertical (4:5). Keep a ~90px clear safe margin. Put a small 'What's in my Fridge' wordmark (the word 'Fridge' in green with a tiny leaf) in the bottom-left of every slide.
- Phone mockups: a sleek modern smartphone, thin dark bezel, rounded corners, soft shadow, tilted ~8 degrees. IMPORTANT — leave the phone SCREEN as a flat placeholder filled solid mint #E6EFE8 with the word 'SCREENSHOT' centred; I will drop my real app screenshot in afterwards.
- Keep it cool and trendy — like a high-end food brand, not a boring explainer. Vary compositions so slides feel fresh.

USE MY UPLOADED PHOTO — IMPORTANT:

- Alongside this prompt I am uploading ONE photo of real ingredients I have at home (for example chicken, coriander, peppers and rice — but it will be whatever I actually photographed this time).
- Treat my uploaded photo as the single source of truth for all the FOOD in this carousel. Wherever a slide shows ingredients, groceries, a fridge, meal ideas or a finished dish, build it from the ACTUAL items visible in my photo — the same ingredients, colours and quantities. Keep them photo-real and appetising.
- Any specific foods named in the slide descriptions below are only examples — replace them with what is actually in my photo. Do NOT invent hero ingredients that aren't in my photo.
- Where a slide shows meal ideas or a finished dish, make them dishes you could realistically cook from MY photographed ingredients, and use those real dish names in the overlay text (e.g. if I photographed chicken + coriander + lime, a slide might suggest 'Coriander-lime chicken').
- Keep the brand styling, overlays, layout and text below exactly as described — only the food itself should change to match my photo.

SLIDES (the food in these should match my uploaded photo):

Slide 1 — HOOK. Lifestyle photo: night kitchen, a person silhouetted against a bright open fridge that is visibly full of food, scratching their head. Fraunces headline: "There's nothing to eat"... in a full fridge?"

Slide 2 — App in use. Phone mockup (SCREENSHOT placeholder) showing a chat with tappable prompts: 'Dinner ideas', 'Use what's expiring', 'No extra shopping'. Floating pill: 'Just ask.'

Slide 3 — App in use. Phone (SCREENSHOT placeholder) showing the AI's meal suggestions as cards. Floating overlay card: 'Built only from what you have.' Headline: 'It reads your actual fridge.'

Slide 4 — Lifestyle + app. Cosy kitchen, mug of tea, phone in hand showing a saved meal (SCREENSHOT placeholder). Overlay pill: 'Save the ones you love.'

Slide 5 — PAYOFF. A warm plated meal, candle-lit dinner vibe. Fraunces line: 'A full fridge always has an answer.' Sub: 'Ask away — free to use.' Wordmark.

SCREENSHOTS TO CAPTURE

- The chat screen with the tappable prompt chips.
- A meal-suggestions result (cards) in chat.
- The 'cook for N people' / cuisine picker.
- A saved meal in the Meals tab.

CAPTION

A fridge full of food and still 'nothing to eat'? We've all been there.

Open the chat, tap a prompt, and What's in my Fridge answers with real meals — built only from what you've actually got. Save the winners for next time.

Your fridge, finally useful.

Free to use — link in bio.

Post 5 — Cook a specific dish — have vs need

THE HOOK (slide 1 question)

Know the dish — but not what's missing?

THE CAROUSEL

- Slide 1 (hook): a few ingredients + a phone, mid-decision (e.g. craving carbonara).
- Slides 2–4: name the dish, app splits it into 'You have' vs 'You need'.
- Slide 5 (payoff): 'From craving to cooking — no guesswork.'

MASTER PROMPT — paste this whole block into your AI image tool

Create a 5-slide Instagram carousel (1080x1350 each) for the feature: Cook a specific dish — have vs need. Generate each slide as a separate image. Follow the brand style exactly.

BRAND STYLE — apply to EVERY slide:

- App: "What's in my Fridge" — a calm, premium home-cooking app that tracks your fridge and tells you what to cook.
- Colours: warm cream background #FAF7F2; primary green #2F7D5A; deep green #28694C; soft mint #E6EFE8; leaf green #7BB497; near-black ink #1F1B16; soft ink #6B6358; off-white #FFFDF8.
- Fonts: big headlines set in 'Fraunces' (an elegant high-contrast serif); all supporting text and UI labels in 'Plus Jakarta Sans' (a clean geometric sans).
- Mood: bright natural daylight, real lived-in home kitchens, editorial and modern, warm and aspirational with a little moodiness. Never sterile, corporate, or cheesy stock.
- Overlays: floating rounded 'pill' chips and soft cards (fully rounded corners, gentle drop shadow, cream/white fill, a small green icon + ink text) — the same UI-callout look as the website. 'NEW' tags are solid green uppercase pills. Category chips are tiny rounded tags (produce = soft green, dairy = soft blue, bakery = soft tan).
- Format: 1080 x 1350 px vertical (4:5). Keep a ~90px clear safe margin. Put a small 'What's in my Fridge' wordmark (the word 'Fridge' in green with a tiny leaf) in the bottom-left of every slide.
- Phone mockups: a sleek modern smartphone, thin dark bezel, rounded corners, soft shadow, tilted ~8 degrees. IMPORTANT — leave the phone SCREEN as a flat placeholder filled solid mint #E6EFE8 with the word 'SCREENSHOT' centred; I will drop my real app screenshot in afterwards.
- Keep it cool and trendy — like a high-end food brand, not a boring explainer. Vary compositions so slides feel fresh.

USE MY UPLOADED PHOTO — IMPORTANT:

- Alongside this prompt I am uploading ONE photo of real ingredients I have at home (for example chicken, coriander, peppers and rice — but it will be whatever I actually photographed this time).
- Treat my uploaded photo as the single source of truth for all the FOOD in this carousel. Wherever a slide shows ingredients, groceries, a fridge, meal ideas or a finished dish, build it from the ACTUAL items visible in my photo — the same ingredients, colours and quantities. Keep them photo-real and appetising.
- Any specific foods named in the slide descriptions below are only examples — replace them with what is actually in my photo. Do NOT invent hero ingredients that aren't in my photo.
- Where a slide shows meal ideas or a finished dish, make them dishes you could realistically cook from MY photographed ingredients, and use those real dish names in the overlay text (e.g. if I photographed chicken + coriander + lime, a slide might suggest 'Coriander-lime chicken').
- Keep the brand styling, overlays, layout and text below exactly as described — only the food itself should change to match my photo.

SLIDES (the food in these should match my uploaded photo):

Slide 1 — HOOK. Lifestyle photo: eggs, a hunk of parmesan and spaghetti on a wooden board, someone's phone beside it. Warm Italian-kitchen mood. Fraunces headline: 'Know the dish — but not what's missing?'

Slide 2 — App in use. Phone mockup (SCREENSHOT placeholder) with a typed dish 'Carbonara'. Floating pill: 'Just name it.' Caption card: 'Any dish you fancy.'

Slide 3 — App in use. Phone (SCREENSHOT placeholder) showing two tidy columns. Floating green card 'You have: pasta, eggs, parmesan' and a soft amber card 'You need: pancetta, black pepper'. Headline: 'Instantly split into have vs need.'

Slide 4 — App in use. Phone (SCREENSHOT placeholder) with a one-tap 'Add to shopping list' button highlighted by a

floating pill 'One tap to your list.'

Slide 5 — PAYOFF. A finished bowl of the dish, fork twirl, steam. Fraunces line: 'From craving to cooking — no guesswork.' Sub: 'Free to use.' Wordmark.

SCREENSHOTS TO CAPTURE

- Chat dish mode — typing a dish name (e.g. 'carbonara').
- The dish-check result showing 'Have' vs 'Need' lists.
- Adding the 'need' items to the shopping list.
- The shopping list with those items added.

CAPTION

Craving carbonara but no idea what you're missing?

Tell What's in my Fridge the dish and it instantly splits it into what you've already got and the few bits you still need — then adds them to your list in a tap.

From craving to cooking, sorted.

Free to use — link in bio.

HASHTAGS

Post 6 — Step-by-step recipes, scaled to you (Plus)

THE HOOK (slide 1 question)

Wish someone would just talk you through it?

THE CAROUSEL

- Slide 1 (hook): slightly chaotic but warm cooking scene, hands floury.
- Slides 2-4: pick how many you're feeding → clear scaled steps.
- Slide 5 (payoff): 'Cook anything — confidently.'

MASTER PROMPT — paste this whole block into your AI image tool

Create a 5-slide Instagram carousel (1080x1350 each) for the feature: Step-by-step recipes, scaled to you (Plus). Generate each slide as a separate image. Follow the brand style exactly.

BRAND STYLE — apply to EVERY slide:

- App: "What's in my Fridge" — a calm, premium home-cooking app that tracks your fridge and tells you what to cook.
- Colours: warm cream background #FAF7F2; primary green #2F7D5A; deep green #28694C; soft mint #E6EFE8; leaf green #7BB497; near-black ink #1F1B16; soft ink #6B6358; off-white #FFFDF8.
- Fonts: big headlines set in 'Fraunces' (an elegant high-contrast serif); all supporting text and UI labels in 'Plus Jakarta Sans' (a clean geometric sans).
- Mood: bright natural daylight, real lived-in home kitchens, editorial and modern, warm and aspirational with a little moodiness. Never sterile, corporate, or cheesy stock.
- Overlays: floating rounded 'pill' chips and soft cards (fully rounded corners, gentle drop shadow, cream/white fill, a small green icon + ink text) — the same UI-callout look as the website. 'NEW' tags are solid green uppercase pills. Category chips are tiny rounded tags (produce = soft green, dairy = soft blue, bakery = soft tan).
- Format: 1080 x 1350 px vertical (4:5). Keep a ~90px clear safe margin. Put a small 'What's in my Fridge' wordmark (the word 'Fridge' in green with a tiny leaf) in the bottom-left of every slide.
- Phone mockups: a sleek modern smartphone, thin dark bezel, rounded corners, soft shadow, tilted ~8 degrees. IMPORTANT — leave the phone SCREEN as a flat placeholder filled solid mint #E6EFE8 with the word 'SCREENSHOT' centred; I will drop my real app screenshot in afterwards.
- Keep it cool and trendy — like a high-end food brand, not a boring explainer. Vary compositions so slides feel fresh.

USE MY UPLOADED PHOTO — IMPORTANT:

- Alongside this prompt I am uploading ONE photo of real ingredients I have at home (for example chicken, coriander, peppers and rice — but it will be whatever I actually photographed this time).
- Treat my uploaded photo as the single source of truth for all the FOOD in this carousel. Wherever a slide shows ingredients, groceries, a fridge, meal ideas or a finished dish, build it from the ACTUAL items visible in my photo — the same ingredients, colours and quantities. Keep them photo-real and appetising.
- Any specific foods named in the slide descriptions below are only examples — replace them with what is actually in my photo. Do NOT invent hero ingredients that aren't in my photo.
- Where a slide shows meal ideas or a finished dish, make them dishes you could realistically cook from MY photographed ingredients, and use those real dish names in the overlay text (e.g. if I photographed chicken + coriander + lime, a slide might suggest 'Coriander-lime chicken').
- Keep the brand styling, overlays, layout and text below exactly as described — only the food itself should change to match my photo.

SLIDES (the food in these should match my uploaded photo):

Slide 1 — HOOK. Lifestyle photo: hands mid-cook, flour on the counter, a slightly messy but warm and real home kitchen. Fraunces headline: 'Wish someone would just talk you through it?'

Slide 2 — App in use. Phone mockup (SCREENSHOT placeholder) with a servings stepper '2 people'. Floating pill: 'Cooking for how many?' Caption: 'Quantities scale automatically.'

Slide 3 — App in use. Phone (SCREENSHOT placeholder) showing a clean numbered recipe — ingredients + steps. Floating card: 'Clear steps, exact amounts.' Headline: 'A calm, confident method.'

Slide 4 — Lifestyle + app. The dish coming together on the hob, phone propped showing the next step (SCREENSHOT placeholder). Overlay pill: 'Follow along, step by step.'

Slide 5 — PAYOFF. The finished dish plated beautifully. Fraunces line: 'Cook anything — confidently.' Small 'Plus' green pill. Sub: 'Unlock step-by-step with Plus.' Wordmark.

SCREENSHOTS TO CAPTURE

- The 'How to' / method sheet with the servings stepper.
- The full recipe — ingredients list + numbered steps.
- The 'cooking for N' picker before generating.
- A saved meal with the 'How to' button.

CAPTION

Got the ingredients but not the confidence?

What's in my Fridge turns any idea into a clear, step-by-step recipe — scaled to exactly how many you're feeding, with real quantities. Like a calm friend talking you through it.

Cook anything. (A Plus feature.)

Start free — link in bio.

Post 7 — Smart shopping list, by aisle

THE HOOK (slide 1 question)

Always forget the one thing you went for?

THE CAROUSEL

- Slide 1 (hook): a trolley/aisle POV, looking lost.
- Slides 2–4: list builds itself, groups by aisle, syncs.
- Slide 5 (payoff): 'Shop once. Get everything.'

MASTER PROMPT — paste this whole block into your AI image tool

Create a 5-slide Instagram carousel (1080x1350 each) for the feature: Smart shopping list, by aisle. Generate each slide as a separate image. Follow the brand style exactly.

BRAND STYLE — apply to EVERY slide:

- App: "What's in my Fridge" — a calm, premium home-cooking app that tracks your fridge and tells you what to cook.
- Colours: warm cream background #FAF7F2; primary green #2F7D5A; deep green #28694C; soft mint #E6EFE8; leaf green #7BB497; near-black ink #1F1B16; soft ink #6B6358; off-white #FFFDF8.
- Fonts: big headlines set in 'Fraunces' (an elegant high-contrast serif); all supporting text and UI labels in 'Plus Jakarta Sans' (a clean geometric sans).
- Mood: bright natural daylight, real lived-in home kitchens, editorial and modern, warm and aspirational with a little moodiness. Never sterile, corporate, or cheesy stock.
- Overlays: floating rounded 'pill' chips and soft cards (fully rounded corners, gentle drop shadow, cream/white fill, a small green icon + ink text) — the same UI-callout look as the website. 'NEW' tags are solid green uppercase pills. Category chips are tiny rounded tags (produce = soft green, dairy = soft blue, bakery = soft tan).
- Format: 1080 x 1350 px vertical (4:5). Keep a ~90px clear safe margin. Put a small 'What's in my Fridge' wordmark (the word 'Fridge' in green with a tiny leaf) in the bottom-left of every slide.
- Phone mockups: a sleek modern smartphone, thin dark bezel, rounded corners, soft shadow, tilted ~8 degrees. IMPORTANT — leave the phone SCREEN as a flat placeholder filled solid mint #E6EFE8 with the word 'SCREENSHOT' centred; I will drop my real app screenshot in afterwards.
- Keep it cool and trendy — like a high-end food brand, not a boring explainer. Vary compositions so slides feel fresh.

USE MY UPLOADED PHOTO — IMPORTANT:

- Alongside this prompt I am uploading ONE photo of real ingredients I have at home (for example chicken, coriander, peppers and rice — but it will be whatever I actually photographed this time).
- Treat my uploaded photo as the single source of truth for all the FOOD in this carousel. Wherever a slide shows ingredients, groceries, a fridge, meal ideas or a finished dish, build it from the ACTUAL items visible in my photo — the same ingredients, colours and quantities. Keep them photo-real and appetising.
- Any specific foods named in the slide descriptions below are only examples — replace them with what is actually in my photo. Do NOT invent hero ingredients that aren't in my photo.
- Where a slide shows meal ideas or a finished dish, make them dishes you could realistically cook from MY photographed ingredients, and use those real dish names in the overlay text (e.g. if I photographed chicken + coriander + lime, a slide might suggest 'Coriander-lime chicken').
- Keep the brand styling, overlays, layout and text below exactly as described — only the food itself should change to match my photo.

SLIDES (the food in these should match my uploaded photo):

Slide 1 — HOOK. Lifestyle photo: first-person POV pushing a trolley down a bright supermarket aisle, slightly blurred motion. Fraunces headline: 'Always forget the one thing you went for?'

Slide 2 — App in use. Phone mockup (SCREENSHOT placeholder) showing the shopping list grouped into aisle sections (Produce, Dairy, Bakery). Floating pill: 'Sorted by aisle.' Caption: 'Shop section by section.'

Slide 3 — App in use. Phone (SCREENSHOT placeholder) showing meal extras being added. Floating card: 'Dinner ideas add their bits automatically.' Headline: 'It builds itself.'

Slide 4 — Lifestyle + app. Putting shopping away into the fridge, phone showing 'file it all back in one tap' (SCREENSHOT placeholder). Overlay pill: 'Tick off, then file it away.'

Slide 5 — PAYOFF. A neatly stocked fridge, satisfying. Fraunces line: 'Shop once. Get everything.' Sub: 'Syncs across your devices. Free with Plus.' Wordmark.

SCREENSHOTS TO CAPTURE

- The shopping list grouped by aisle/category.
- Adding a meal's extras to the list (from a meal card).
- Ticking items off / the bought state.
- Filing bought items back into the fridge in one tap.

CAPTION

Wrote a list... left it on the counter... forgot the milk anyway?

What's in my Fridge builds your list as you go — pulling in the extras from your dinner ideas and the essentials you're low on — then groups it by aisle so you breeze through the shop.

Shop once. Get everything.

Link in bio.

Post 8 — Never run out of essentials

THE HOOK (slide 1 question)

Out of coffee. Again.

THE CAROUSEL

- Slide 1 (hook): an empty coffee jar / empty milk bottle, morning light, despair.
- Slides 2–4: mark your essentials, app flags low/out, one tap to list.
- Slide 5 (payoff): 'Never caught short again.'

MASTER PROMPT — paste this whole block into your AI image tool

Create a 5-slide Instagram carousel (1080x1350 each) for the feature: Never run out of essentials. Generate each slide as a separate image. Follow the brand style exactly.

BRAND STYLE — apply to EVERY slide:

- App: "What's in my Fridge" — a calm, premium home-cooking app that tracks your fridge and tells you what to cook.
- Colours: warm cream background #FAF7F2; primary green #2F7D5A; deep green #28694C; soft mint #E6EFE8; leaf green #7BB497; near-black ink #1F1B16; soft ink #6B6358; off-white #FFFDF8.
- Fonts: big headlines set in 'Fraunces' (an elegant high-contrast serif); all supporting text and UI labels in 'Plus Jakarta Sans' (a clean geometric sans).
- Mood: bright natural daylight, real lived-in home kitchens, editorial and modern, warm and aspirational with a little moodiness. Never sterile, corporate, or cheesy stock.
- Overlays: floating rounded 'pill' chips and soft cards (fully rounded corners, gentle drop shadow, cream/white fill, a small green icon + ink text) — the same UI-callout look as the website. 'NEW' tags are solid green uppercase pills. Category chips are tiny rounded tags (produce = soft green, dairy = soft blue, bakery = soft tan).
- Format: 1080 x 1350 px vertical (4:5). Keep a ~90px clear safe margin. Put a small 'What's in my Fridge' wordmark (the word 'Fridge' in green with a tiny leaf) in the bottom-left of every slide.
- Phone mockups: a sleek modern smartphone, thin dark bezel, rounded corners, soft shadow, tilted ~8 degrees. IMPORTANT — leave the phone SCREEN as a flat placeholder filled solid mint #E6EFE8 with the word 'SCREENSHOT' centred; I will drop my real app screenshot in afterwards.
- Keep it cool and trendy — like a high-end food brand, not a boring explainer. Vary compositions so slides feel fresh.

USE MY UPLOADED PHOTO — IMPORTANT:

- Alongside this prompt I am uploading ONE photo of real ingredients I have at home (for example chicken, coriander, peppers and rice — but it will be whatever I actually photographed this time).
- Treat my uploaded photo as the single source of truth for all the FOOD in this carousel. Wherever a slide shows ingredients, groceries, a fridge, meal ideas or a finished dish, build it from the ACTUAL items visible in my photo — the same ingredients, colours and quantities. Keep them photo-real and appetising.
- Any specific foods named in the slide descriptions below are only examples — replace them with what is actually in my photo. Do NOT invent hero ingredients that aren't in my photo.

- Keep the brand styling, overlays, layout and text below exactly as described — only the food itself should change to match my photo.

SLIDES (the food in these should match my uploaded photo):

Slide 1 — HOOK. Lifestyle photo: an empty glass coffee jar tipped over by a coffee machine in soft morning light, an empty mug waiting. Fraunces headline: 'Out of coffee. Again.'

Slide 2 — App in use. Phone mockup (SCREENSHOT placeholder) showing the Essentials list with a few starred staples. Floating pill: 'Mark your must-haves.' Caption: 'Coffee, milk, eggs, oil...'

Slide 3 — App in use. Phone (SCREENSHOT placeholder) showing items flagged 'Low' and 'Out'. Floating amber card 'Running low: Coffee'. Headline: 'It warns you before you run out.'

Slide 4 — App in use. Phone (SCREENSHOT placeholder) with a single tap adding the staple to the list. Overlay pill: 'One tap, on the list.'

Slide 5 — PAYOFF. A perfect morning coffee being poured, cosy. Fraunces line: 'Never caught short again.' Sub: 'Free with Plus.' Wordmark.

SCREENSHOTS TO CAPTURE

- The Essentials/Staples tab with starred items.
- Staples showing 'low' / 'out' flags.
- One-tap add a staple to the shopping list.
- Marking an item as an essential (the star).

CAPTION

Is there anything worse than reaching for the coffee and finding an empty jar?

Mark the things you always keep and What's in my Fridge flags them the moment you're low or out — one tap adds them to your list.

Never caught short again.

Start free — link in bio.

Post 9 — Cooks for your diet & allergies

THE HOOK (slide 1 question)

Veggie? Gluten-free? Nut allergy?

THE CAROUSEL

- Slide 1 (hook): a vibrant, colourful spread of fresh plant-based food.
- Slides 2-4: set your diet + allergies once, every idea respects it.
- Slide 5 (payoff): 'Food that fits you. Every time.'

MASTER PROMPT — paste this whole block into your AI image tool

Create a 5-slide Instagram carousel (1080x1350 each) for the feature: Cooks for your diet & allergies. Generate each slide as a separate image. Follow the brand style exactly.

BRAND STYLE — apply to EVERY slide:

- App: "What's in my Fridge" — a calm, premium home-cooking app that tracks your fridge and tells you what to cook.
- Colours: warm cream background #FAF7F2; primary green #2F7D5A; deep green #28694C; soft mint #E6EFE8; leaf green #7BB497; near-black ink #1F1B16; soft ink #6B6358; off-white #FFFDF8.

- Keep the brand styling, overlays, layout and text below exactly as described — only the food itself should change to match my photo.

SLIDES (the food in these should match my uploaded photo):

Slide 1 — HOOK. Lifestyle photo: a vivid overhead spread of colourful fresh vegetables, grains and herbs on a table. Fraunces headline: 'Veggie? Gluten-free? Nut allergy?'

Slide 2 — App in use. Phone mockup (SCREENSHOT placeholder) showing diet preference chips: 'Vegetarian', 'Gluten-free', 'No nuts'. Floating pill: 'Set it once.' Caption: 'In your account.'

Slide 3 — App in use. Phone (SCREENSHOT placeholder) showing meal ideas all matching the diet. Floating card: 'Every idea respects it.' Headline: 'No more scrolling past meals you can't eat.'

Slide 4 — Lifestyle + app. A beautiful diet-friendly plate, phone beside it (SCREENSHOT placeholder). Soft overlay pill: 'Always check labels for allergens.' (small, responsible note).

Slide 5 — PAYOFF. The finished plate, fresh and vibrant. Fraunces line: 'Food that fits you. Every time.' Sub: 'Free to use.' Wordmark.

SCREENSHOTS TO CAPTURE

- The Account → dietary preferences screen (diet + allergy chips).
- A meal-ideas result that reflects the chosen diet.
- The allergy acknowledgement note (responsible touch).
- The diet chips selected state.

CAPTION

Tired of scrolling past meals you can't actually eat?

Set your diet and allergies once — vegetarian, gluten-free, no nuts, whatever you need — and every idea What's in my Fridge gives you respects it.

(Always check labels for allergens — AI can make mistakes.)

Food that fits you. Free to use — link in bio.

Post 10 — Waste less, save money

THE HOOK (slide 1 question)

Binning £60 of food a month?

THE CAROUSEL

- Slide 1 (hook): fresh food next to a bin — the cost of waste, or a money jar.
- Slides 2–4: scan receipts, track freshness, cook what you have.
- Slide 5 (payoff): 'Eat well. Waste less. Keep the cash.'

MASTER PROMPT — paste this whole block into your AI image tool

Create a 5-slide Instagram carousel (1080x1350 each) for the feature: Waste less, save money. Generate each slide as a separate image. Follow the brand style exactly.

BRAND STYLE — apply to EVERY slide:

- App: "What's in my Fridge" — a calm, premium home-cooking app that tracks your fridge and tells you what to cook.
- Colours: warm cream background #FAF7F2; primary green #2F7D5A; deep green #28694C; soft mint #E6EFE8; leaf green #7BB497; near-black ink #1F1B16; soft ink #6B6358; off-white #FFFDF8.

- Treat my uploaded photo as the single source of truth for all the FOOD in this carousel. Wherever a slide shows ingredients, groceries, a fridge, meal ideas or a finished dish, build it from the ACTUAL items visible in my photo — the same ingredients, colours and quantities. Keep them photo-real and appetising.
- Any specific foods named in the slide descriptions below are only examples — replace them with what is actually in my photo. Do NOT invent hero ingredients that aren't in my photo.
- Where a slide shows meal ideas or a finished dish, make them dishes you could realistically cook from MY photographed ingredients, and use those real dish names in the overlay text (e.g. if I photographed chicken + coriander + lime, a slide might suggest 'Coriander-lime chicken').
- Keep the brand styling, overlays, layout and text below exactly as described — only the food itself should change to match my photo.

SLIDES (the food in these should match my uploaded photo):

Slide 1 — HOOK. Lifestyle photo: a chopping board split visually — fresh good food on one side, a kitchen bin on the other; or a glass jar of coins beside fresh veg. Fraunces headline: 'Binning £60 of food a month?'

Slide 2 — App in use. Phone mockup (SCREENSHOT placeholder) photographing a supermarket receipt. Floating pill: 'Scan the receipt too.' Caption: 'Everything logged in seconds.'

Slide 3 — App in use. Phone (SCREENSHOT placeholder) showing freshness tracking + meal ideas. Floating card: 'Use it up before it goes off.' Headline: 'Three habits, one app.'

Slide 4 — Lifestyle + app. A satisfying home-cooked meal made from leftovers, phone beside it (SCREENSHOT placeholder). Overlay pill: 'Cook what you already paid for.'

Slide 5 — PAYOFF. A warm, abundant table scene. Fraunces line: 'Eat well. Waste less. Keep the cash.' Sub: 'Free to start — no card.' Wordmark.

SCREENSHOTS TO CAPTURE

- The receipt-scan screen / result.
- The freshness-sorted inventory.
- A meal made from what's expiring (chat result).
- The 'Used' / archive list (what you got through).

CAPTION

UK households throw away around £60 of edible food every month. That's a takeaway. Every. Week.

What's in my Fridge helps you log it (snap a receipt), track it before it turns, and cook what you've already paid for.

Eat well. Waste less. Keep the cash.

Free to start — link in bio.
